

CHANDANI MOURYA

+91 7021405056 | chandanimaurya56@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Pune, India

Professional Summary

Full Stack Engineer with **2+ years** shipping production web, mobile, and AI-powered products end-to-end – solo-owning client builds and contributing on cross-org engineering teams. Depth in API performance, LLM integration, and system design.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Next.js, React Native, Zustand, Tailwind CSS, ShadCN
Backend: Node.js, Express.js, FastAPI, Django, REST APIs
Databases: PostgreSQL, MongoDB, MySQL
AI & Automation: LLM integration, prompt engineering, Claude Code
Architecture & Security: API design, microservices, JWT/OAuth2, RBAC
Cloud & DevOps: AWS (S3), Docker, Git, CI/CD, Vercel, Render

Experience

Software Engineer

Mar 2024 – Present

Copods

Pune, India

- Built an **M&A due-diligence platform** (Next.js, Node.js, PostgreSQL, Firebase, AWS) as one of 10 engineers across two partner orgs; advisors upload data-room documents and answer buyer diligence questions via AI-generated responses or manual input, cutting review time by 20% for early users.
- Architected a full-stack cybersecurity platform (FastAPI, PostgreSQL, React) as sole engineer working directly with the client, with JWT/RBAC access control; improved **API performance by 40%** via query optimization, indexing, and caching.
- Shipped an **AI meeting-to-pitch-deck generator** (Electron, Express.js, qwen 2.5) that transcribes live meetings and auto-drafts client-ready decks, saving 2 hrs of manual deck preparation per meeting.
- Built a Google Chat leave-management bot (Apps Script, Google Cloud) that replaced HR's manual spreadsheet process for requests, approvals, and tracking.
- Own the **end-to-end product lifecycle** on solo builds – architecture, development, unit and integration testing (Jest, Pytest), CI/CD deployment, and client communication – working in two-week Agile cycles with peer code review.

Full Stack Developer Intern

Aug 2023 – Oct 2023

NullClass

Remote

- Built a Q&A platform with subscription tiers, multilingual support, and analytics (Node.js, JWT, REST APIs), lifting user engagement **35%**.

Projects

AI Training System – turns raw docs into a full training curriculum | *React, FastAPI, PostgreSQL, Gemini API*

- Engineered an LLM content pipeline that converts raw documents into structured modules, quizzes, and evaluations, cutting content-creation time **70%**.
- Added role-based access and reusable prompt workflows to support self-serve delivery at scale.

AI Interview Preparation Platform – a voice-AI mock interviewer | *Next.js, Firebase, Vapi, Gemini API*

- Built a **real-time voice AI interviewer** that runs mock interviews, scores answers, and returns instant feedback, with session state persisted in Firebase for cross-device continuity.

TicketFlow – event discovery & booking with live seat selection | *React Native, Expo, TypeScript*

- Built a mobile event booking flow with interactive seat selection (Seats.io), OTP authentication, search, and dark mode, tuned for smooth performance on low-end devices.

Education

B.E. in Computer Engineering | **CGPA: 9.4 / 10**

2019 – 2023

University of Mumbai

Navi Mumbai, Maharashtra

Achievement

Smart India Hackathon 2022 – Finalist

Aug 2022

Ministry of Education

India
