Professional Summary

Full Stack Software Engineer with 2+ years of experience building scalable, production-grade web and mobile applications. Proven impact on API performance (~**40% improvement**) and workflow efficiency. Experienced in **AI integration (Gemini, Vapi)** and building LLM-powered pipelines. Comfortable owning products end-to-end — from architecture and development to deployment and client communication.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Next.js, React Native, ShadCN, Tailwind CSS
Backend: FastAPI, Django, Node.js, Express.js, REST APIs
Databases: PostgreSQL, MongoDB, MySQL, Firebase, Redis
System Design: REST API Design, Caching, Database Indexing, Microservices, Role-Based Access Control
DevOps & Tools: Docker, Git, CI/CD Pipelines, AWS (S3), Vercel, Render
Auth & Security: JWT, OAuth2, RBAC
AI: LLM Integration, Prompt Engineering, Gemini API, Vapi, Claude Code, Cursor

Experience

Software Engineer

Mar 2024 – Present

Copods

Mumbai, India

- Architected and delivered a full-stack **Cybersecurity Platform** (FastAPI, PostgreSQL, React); improved API performance by ~**40%** through query optimization, indexing, and caching.
- Designed **secure backend architecture** using JWT and RBAC for multi-role enterprise access control.
- Built a reusable **data visualization system** (D3.js: Sankey diagrams, network graphs), reducing demo preparation effort by ~**50%**.
- Developed cross-platform apps (React + React Native), improving workflow efficiency by ~**30%** and app performance by ~**25%**.
- Applied system design principles — API versioning, caching layers, and modular service boundaries — to ensure maintainability and scalability.
- **Owned end-to-end product lifecycle:** architecture, development, deployment, and client communication as sole engineer.
- Used **Claude Code and Cursor** to automate repetitive tasks and accelerate development cycles.

Full Stack Developer Intern

Aug 2023 – Oct 2023

NullClass

Remote

- Built a Q&A platform with subscription tiers, multilingual support, and analytics; increased engagement by ~**35%**.
- Designed REST APIs, JWT authentication, and a modular backend architecture.

Projects

AI Training System | *React, FastAPI, PostgreSQL, Gemini API*

- Built an **LLM-powered pipeline** converting documents into structured modules, quizzes, and evaluations; reduced manual effort by ~**70%**.
- Implemented prompt engineering workflows, content structuring logic, and role-based access for scalable training delivery.

AI Interview Preparation Platform | *Next.js, Firebase, Vapi, Gemini API*

- Built a **real-time voice AI system** with conversational workflows, automated feedback, scoring, and session persistence.
- Designed stateful session architecture using Firebase for cross-device continuity.

Emotion-Based Music Recommendation System | *Python, Flask, React.js, MongoDB*

- Developed ML-based recommendation engine using facial and audio signals; achieved **74%** facial and **85%** audio accuracy.
- Deployed REST API with MongoDB backend integrated with a React.js frontend for real-time recommendations.

Education

University of Mumbai

2019 – 2023

B.E. in Computer Engineering | CGPA: 9.4 / 10

Navi Mumbai, Maharashtra

Achievement

Smart India Hackathon 2022 – Finalist

Aug 2022

Ministry of Education

Gujarat

- Designed a blockchain-based disaster response coordination platform for the National Disaster Response Force (NDRF).
